

HelixTrack Videos

The following section contains project related video resources.

VSCode auto update

The HelixTrack project comes shipped with complete development ecosystem. Once we run the 'open' command, VSCode is installed, all extensions downloaded and we are ready to go. Our latest change introduces check for new updates so our developers can update regularly the whole tool-chain. As you can see in the video, new VSCode updates are detected and developer is asked to update.

Dekstop launcher

We have incorporated launcher capability for fast development start. Launcher will execute all mandatory recipes and bring up the IDE.
